The Place of Wonder

The CIRCLE Effect

CONNECT. INCLUSIVE. RESILIENT. CREATE. LEARN. EMPOWER.

A vibrant, thriving, resilient and cohesive community that builds on and strengthens the good work that's being done out there already, and doing it together to make it happen.

That's what **The CIRCLE effect, Camperdown and surrounds** is all about.

An 18 to 24-month program of events and activities that connects to culture, people and place from live music and arts events, tours, markets and family friendly happenings, to workshops and sessions covering themes of creativity, wellbeing, technology and nature.

The aim is to encourage meaningful social engagement; bring people together; encourage, maintain and sustain volunteerism; and empower the local community after the St Patrick's Day fires.

This shared vision is about learning together and having fun, being innovative and creative, linking to like-minded people, contributing to the culture of our area, simply enjoying some live music and other cultural events on offer and, most importantly, knowing that support is out there and where to go if you need.

A partnership between the Camperdown Community House and The Courthouse Camperdown Inc. who will work closely with other local community groups, businesses and organisations to bring **The CIRCLE effect** to life. Community ownership and developing such partnerships are key to the program's success.

The program aims to be accessible and affordable to all - we'll keep costs down through value adding, supporting and expanding existing structures that are already in place.

The CIRCLE effect will deliver a range of community benefits including intergenerational connection, youth engagement, social inclusion and impacts through connection (e.g. mental health and wellbeing), increasing our sense of pride and connectedness to people and place, while diversifying the local economy.
